### What's New in the HJ Virtual Touchpad?

Easy to use with a single touch of the finger, HJ Virtual Touchpad enables you to type like a pro in just minutes! This product has got a lot of key advantages: - Support the Windows 8 tablet PC - Designed for use with touch screens - Easy to use with a single touch of the finger - Easy to learn, easy to use, easy to find - Responds to the environment, not to the user Is this the HJ Virtual Touchpad? Yes, it's absolutely a Virtual Touchpad. There are many keyboard simulators around, such as HJ Virtual Keyboard, HJ Virtual Keyboard Plus, HJ Touch Key, Easy PTT, etc. So, why should I choose HJ Virtual Touchpad? Because it's the best one I ever used for my touch screen! Its operation is both fast and accurate. With it, I have never written so many words in one day. For those who type a lot, HJ Virtual Touchpad is a must-have! (For example, I type at least 2,000 words in one day to record this description. Compared with typing using a keyboard, I find that I can produce this one in around 5 minutes. Yes, you can do it faster, but you don't even need to! And using this application, you can continue your work uninterrupted in another window.) In addition, HJ Virtual Touchpad is easy to use. Press your finger on the virtual keyboard to type. You can use both of your hands, and the touch-screen size is more than enough. It has both typing and cursor functions. And using the multi-touch, it is even easier to point and click. Also, HJ Virtual Touchpad is completely free. So, what are you waiting for? Download it today, and start to type like a pro! The Key Features of HJ Virtual Touchpad: - Support the Windows 8 tablet PC - Designed for use with touch screens - Easy to use with a single touch of the finger - Easy to learn, easy to use, easy to find - Responds to the environment, not to the user What's New in this Version: New: - You can now enter a key combo using long pressing and holding a key; - Fixed the case that the keyboard was not displayed on the background when you have an active window; - Fixed the case that the touch event could not be reported when the user moves their finger quickly; - Fixed the case that the previous page could not be changed when you exit the keyboard; - Fixed the case that the search results window could not be switched to the previous page when you click the button "Previous" in the search results window

---
